

# Integration of Human Immunodeficiency Virus (HIV) services for humanitarian crisis population in the National HIV program in Rwanda: Case of Nyabiheke Refugee camp

<sup>1</sup>**Nyirimanzi Joseph Desire**, <sup>2</sup>Max Kabarisa, <sup>3</sup>Diane Mutamba, <sup>4</sup>Umuhoza Stella Matutina, <sup>4</sup>Kayumba Pierre Claver

<sup>1</sup>Ministry of Health/Gatsibo District Pharmacy, <sup>2</sup>USAID Global Health Supply Chain Program-Procurement and Supply Management, <sup>3</sup>United Nation Population Fund-Rwanda, <sup>4</sup>University of Rwanda/ College of Medicine and Health Sciences/ School of Public Health Kigali,Rwanda

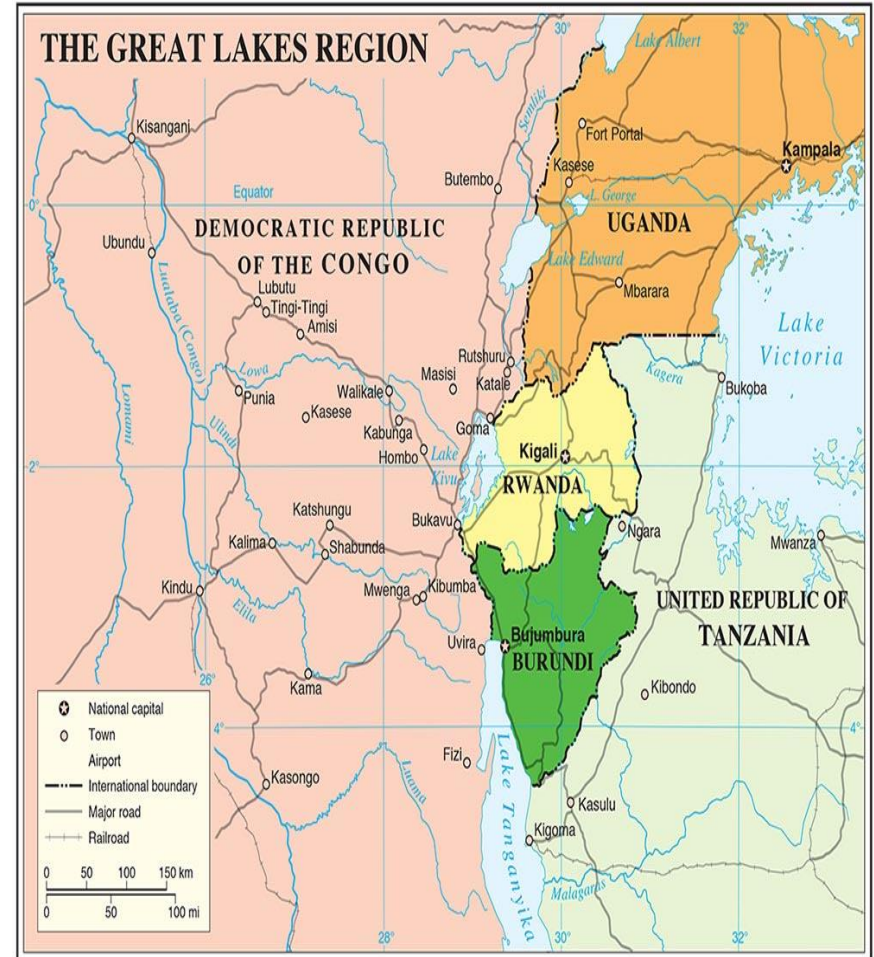

An aerial photograph of a rural landscape. In the foreground, there are rolling hills with patches of green trees and brown, tilled soil. A small cluster of white buildings is visible on a hillside. In the middle ground, a large body of water, likely a lake or reservoir, is nestled between hills. The background shows more distant, hazy mountain ranges under a blue sky with scattered white clouds.

**“The highest attainable standard of health is a fundamental right of every human being.”**

**WORLD HEALTH ORGANIZATION, 1946**

# BACKGROUND

- One person among 113 is a refugee worldwide.
- Great lakes region 2.7 millions
- In most humanitarian crisis, reproductive health is issue
- HIV program for humanitarian settings are not included in National programs
- Maintaining accessibility of comprehensive HIV services for refugees remains a challenge due to competing priorities.

# BACKGROUND

## ☐ 1997 Refugees from neighboring countries

**Data Flow:** Lack of logistic data. No consumption data due to poor reporting system

**Commodity Flow:** Partners distributed products but have insufficient information about stock level of products

Complex supply chain system: different donors not coordinated

# METHODOLOGY

## Data Collection

Analysis of routine logistic data collected on a monthly basis using e-LMIS and RHMIS

## Data Analysis

Descriptive statistics to analyze key outcomes

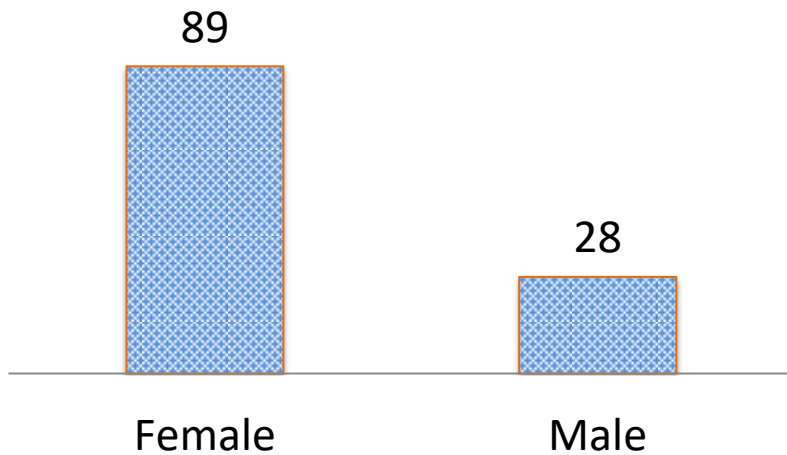

## Intended beneficiaries

Refugees from Nyabiheke camps targeting 14,596 refugees.

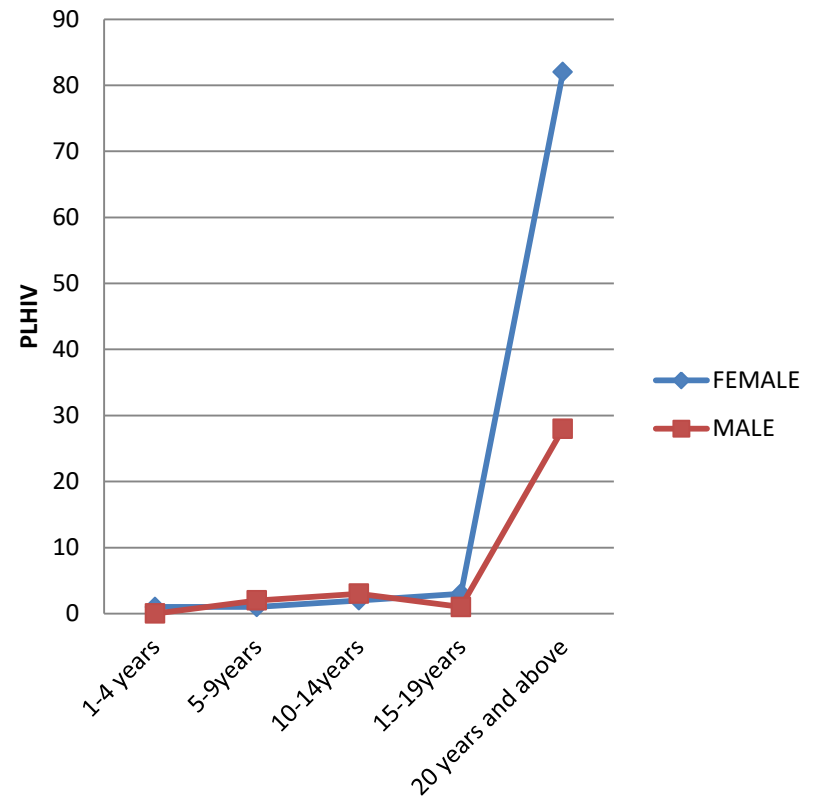

Study was conducted from January to December 2018.

# KEY RESULTS

## ART patient by sex

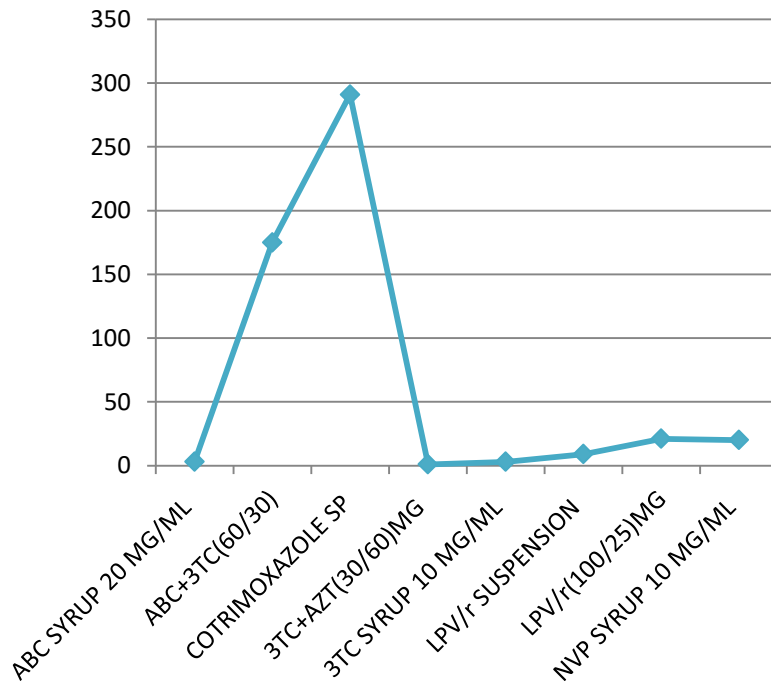

## ART patient by age

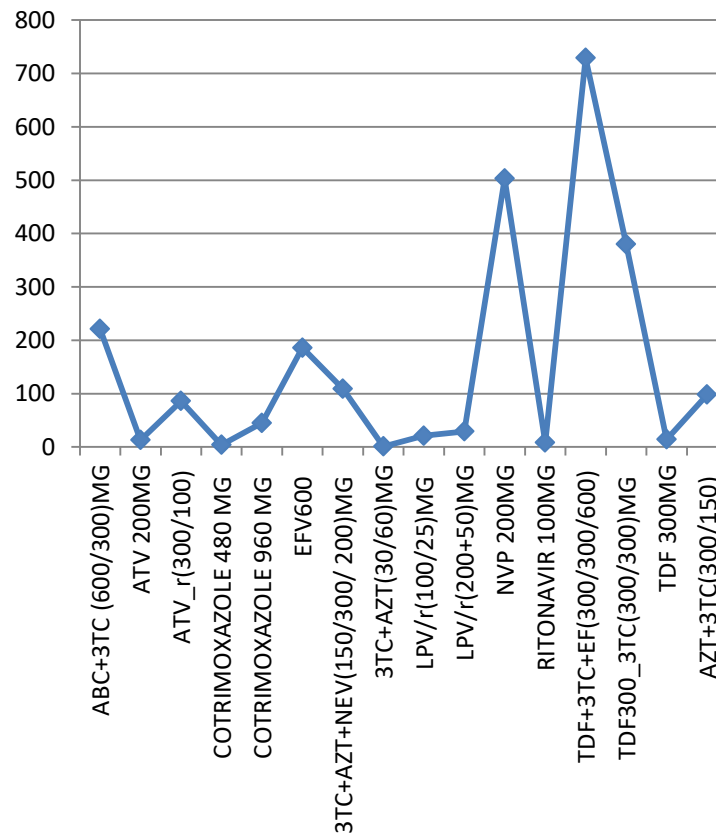

# KEY RESULTS

## ARV Pediatric regimen dispensed

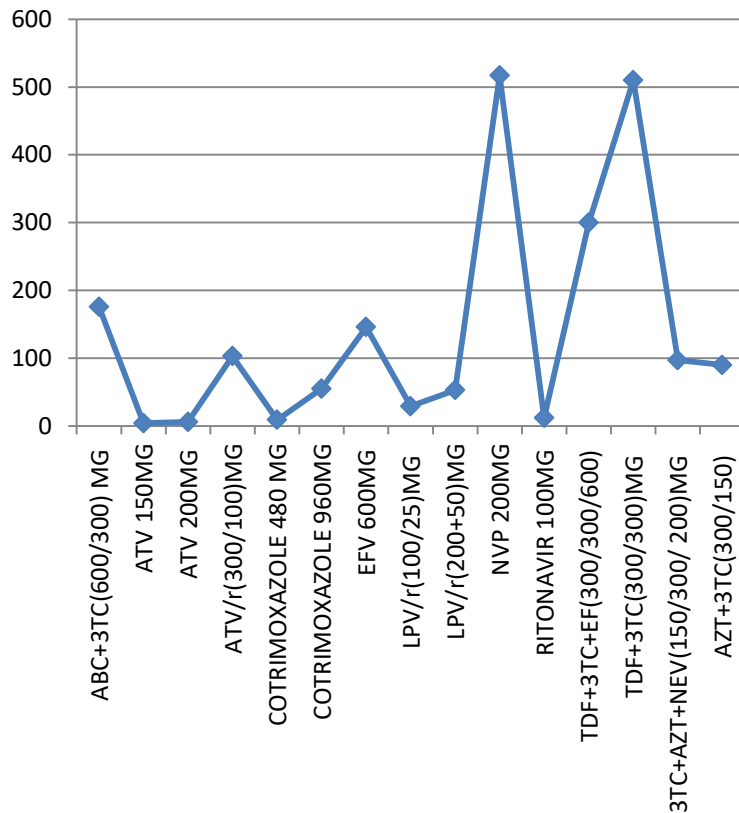

## ARV adult regimen dispensed

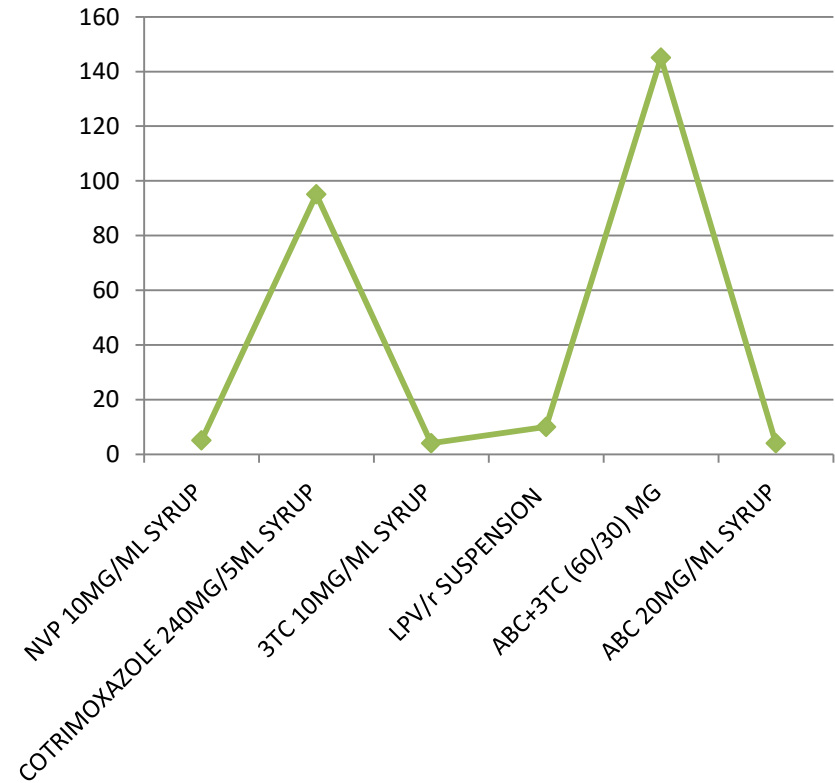

# ART COMMODITIES SUPPLIED

## ARV ADULT REGIMEN

## ARV PEDIATRIC REGIMEN

# CONCLUSION

Integrate demand and supply of HIV commodities and services delivery for refugees in the National HIV program

Improve and sustain the level and quality of HIV commodities provided to refugees and build national resilience

# RECOMMENDATIONS

## Countries hosting humanitarian crisis populations

- Integration of HIV services for humanitarian settings in their National action plans
- Enhance coordination and foster partnership between national and international humanitarian actors and local authorities to sustain access to quality HIV health services in humanitarian settings
